1. A hard surface, all weather road **[#928]** designed for heavy usage runs from Timisoara southward to Vrsac. This same type of hard surface, all weather road **[#928]** runs from Timisoara northwest to Saaged. Both roads are in fair condition, over two lanes in width. The terrain over which the roads run is quite level and high speeds can be attained on them. The top layer of the roads is asphalt surfaced and with a good solid road foundation. The roads are considered to be first class highways in Rumania.
2. A hard surface, all weather road **[#903]** runs from Timisoara southwest to Freidorf, a distance of approximately four to five kilometers. This same type of hard surface, all weather road **[#903]** runs from Sag southwest toward Petrograd via Giulvas. Both roads have a good solid road foundation and the top layer is gravel surfaced with sand. The roads are able to absorb heavy usage. They are over two lanes wide and are crowned for easy drainage.
3. A hard surface, all weather road **[#909]** which is approximately one lane in width runs from Freidorf westward to Conci and Berageaul Mic. The roads are capable of bearing heavy usage and they have a solid road foundation. The top layer is gravel surfaced with sand.
4. A number of loose surface, dry weather dirt roads **[#935]** run in the vicinity of Dimias, Pechul Nou and Sacalaz. The dirt roads are over one lane in width. Occasionally during the dry weather the roads are able to bear heavy usage. However, when it rained the dirt roads became deeply rutted and potholed and it was up to the farmers and villagers to fill up the holes.
